

# Specification worksheet

This worksheet should be used to record the key criteria and constraints. This is your product specification – the measuring stick for assessing your product’s success.

<b>Aesthetics</b> What will the product look, feel or sound like?	
<b>Cost</b> What is the estimated manufacturing cost of the product, and what will its retail price be?	
<b>Customer</b> Who is the product designed for?	
<b>Environment</b> What is the product’s impact on the environment?	
<b>Safety</b> How will the user be kept safe from harm?	
<b>Size</b> Are the proportions of the product appropriate?	
<b>Function</b> How well does the product work - and is it easy to use?	
<b>Materials</b> What is the product made from, and what does this mean for manufacturing?
